

INTERNAL TRAINING DOCUMENT

Operations Officer Lesson Plan

VOS Web V2 — Enterprise Resource Planning System

● Supply Chain Management

● Customer Relationship Management

● Audit, Results & Findings

Role: Internal Operations Officer

Duration: 4 Weeks

Format: Self-paced / Instructor-led

Prepared: July 2026

Role Profile — Operations Officer

The Operations Officer focuses on the day-to-day execution of supply chain transactions, customer-facing sales activities, and ensuring operational compliance through audit tools. Unlike the Operations Manager, this role is **execution-focused** rather than oversight-focused.

SCM RESPONSIBILITIES

- Process inbound deliveries
- Manage inventory & stock transfers
- Handle outbound orders
- Monitor product traceability
- Generate SCM reports & KPIs

CRM RESPONSIBILITIES

- Register & manage customers
- Create & process sales orders
- Manage invoicing & cancellations
- Handle site sales & callsheets
- Oversee customer hub & e-commerce

ARF RESPONSIBILITIES

- Run post-delivery audits
- Review remittance records
- Check document adherence
- Monitor inventory audit findings
- Trace item compliance

Training Objectives

- Navigate the SCM, CRM, and ARF subsystems independently and efficiently
- Execute supply chain transactions from receiving to outbound delivery
- Manage the full customer lifecycle — from registration to invoicing
- Conduct post-delivery audits and validate remittance records in ARF
- Generate operational reports, KPIs, and compliance documents
- Understand how SCM, CRM, and ARF workflows interconnect

Training Schedule Overview

Week	Focus	Subsystem	Approx. Hours
Week 1	Orientation + Supply Chain Foundations	Main Dashboard + SCM	8 hrs
Week 2	Supply Chain Operations (Advanced)	SCM	8 hrs
Week 3	Customer Relationship Management	CRM	9 hrs
Week 4	Audit, Results & Findings + Integration	ARF + All	7 hrs

WEEK 1

Orientation & Supply Chain Foundations

Lesson 1.1 — System Orientation & Navigation

🕒 Duration: 1 hour

TOPICS

- Logging into VOS Web V2 and navigating the Main Dashboard
- Understanding the subsystem sidebar and module navigation
- Setting up your profile (My Profile) and changing your password
- Understanding your access scope — SCM, CRM, and ARF only
- Overview of the Login Activity log for self-review

✂ HANDS-ON ACTIVITY

Log in, navigate to each assigned subsystem (SCM, CRM, ARF) to confirm access, update your profile, and change your password.

Lesson 1.2 — Product & Item Master Data

🕒 Duration: 1.5 hours

TOPICS

- Product Management — product lines, categories, and product records
- Item Master Data Management — product codes, units of measure, specifications
- How item master data links to inventory, invoicing, and audit modules

✂ HANDS-ON ACTIVITY

Search for an existing product in Item Master Data Management. Create a new product entry using the correct category and unit of measure.

💡 Key Concept

Item Master Data is shared across SCM and CRM. Product records created here will appear in inventory and when creating sales orders.

Lesson 1.3 — Supplier Management

🕒 Duration: 1.5 hours

TOPICS

- Registering a new supplier — required fields, contact info, terms
- Editing and managing existing supplier records
- Linking suppliers to products in the item master

✂ HANDS-ON ACTIVITY

Register a new supplier, fill in all required fields, and link the supplier to a product in the item master.

Lesson 1.4 — Warehouse Management & Receiving

🕒 Duration: 2 hours

TOPICS

- Warehouse Management — understanding warehouse structure, bins, and racks
- Receiving & Put-Away — recording incoming deliveries from suppliers
- Assigning received stock to specific warehouse locations
- Verifying inventory levels after a receiving transaction

✂ HANDS-ON ACTIVITY

Simulate a receiving workflow: create a receiving record for a supplier delivery, assign items to a warehouse bin, and verify that the stock level was updated correctly in Inventory Management.

Lesson 1.5 — Inventory Management & Stock View

🕒 Duration: 2 hours

TOPICS

- Inventories — viewing real-time stock across all warehouse locations
- Inventory Management — stock movement records, adjustments
- Understanding stock levels, reorder points, and alerts
- Stock Transfers — moving items between warehouses or bins

✂ HANDS-ON ACTIVITY

Check the current stock level of a specific product across all locations. Perform a stock transfer from one warehouse location to another and confirm the update.

✅ WEEK 1 CHECKPOINT

- ☐ Can navigate SCM, CRM, and ARF from the main sidebar
- ☐ Can create and manage product records in Item Master Data
- ☐ Can register a supplier and link it to a product
- ☐ Can perform a receiving transaction and verify stock update
- ☐ Can view and interpret inventory levels across warehouses

WEEK 2

Supply Chain Operations — Advanced

Lesson 2.1 — Outbound & Order Fulfillment

🕒 Duration: 2 hours

TOPICS

- Outbound — creating and managing outbound orders (pick, pack, ship)
- Order Fulfillment & Distribution — processing and confirming dispatches
- Checking stock availability before confirming fulfillment
- Linking outbound orders to CRM sales orders

✂ HANDS-ON ACTIVITY

Create an outbound order for a sample sales request. Confirm stock availability, process the pick-pack-ship workflow, and mark the order as dispatched.

💡 Key Concept

Outbound orders in SCM are the fulfillment backbone of CRM sales orders. An Operations Officer must coordinate between both subsystems to ensure accurate deliveries.

Lesson 2.2 — Returns & Reverse Logistics

🕒 Duration: 1.5 hours

TOPICS

- Returns & Reverse Logistics — processing returned items from customers
- Restocking returned goods back into inventory
- Documenting return reasons and linking to original orders

✂ HANDS-ON ACTIVITY

Log a customer return for a previously dispatched order. Restock the returned item into the correct warehouse location and verify the inventory update.

Lesson 2.3 — Logistics & Fleet Management

🕒 Duration: 1.5 hours

TOPICS

- Logistics — route planning, carrier assignment, delivery scheduling
- Fleet Management — registering and managing company delivery vehicles
- Assigning drivers and routes to outbound deliveries

✂ HANDS-ON ACTIVITY

Assign a delivery vehicle and driver to a pending outbound order. Schedule the delivery route and log the departure.

Lesson 2.4 — Traceability, Compliance & Controls Security

🕒 Duration: 1.5 hours

TOPICS

- Traceability & Compliance — tracking an item from supplier to end delivery
- Controls Security — understanding access and operational security controls in SCM
- How traceability data feeds into ARF audit reports

✳️ HANDS-ON ACTIVITY

Use the Traceability & Compliance module to trace the full journey of a specific product batch. Note the key events recorded at each stage.

Lesson 2.5 — Monitoring, Reporting & KPIs

🕒 Duration: 1.5 hours

TOPICS

- Monitoring — real-time dashboard for stock levels, pending orders, and alerts
- Reporting & KPI — generating SCM performance reports
- Business Analytics (SCM) — charts for inbound/outbound trends, top suppliers
- File Management — archiving delivery receipts and SCM documents

✳️ HANDS-ON ACTIVITY

Generate the monthly SCM KPI report. Review the Monitoring dashboard and identify any pending alerts. Export the report as Excel.

✅ WEEK 2 CHECKPOINT

- ☐ Can create and process outbound orders through dispatch
- ☐ Can log and restock customer returns
- ☐ Can assign fleet and logistics to deliveries
- ☐ Can trace an item's full supply chain journey
- ☐ Can generate and export SCM KPI and monitoring reports

WEEK 3

Customer Relationship Management (CRM)

Lesson 3.1 — Customer Management & Registration

🕒 Duration: 2 hours

TOPICS

- Customer Management — managing the full customer database
- Customer Registration — registering new customers with required fields
- Customer Classification & Groups — segmenting customers by type and group
- Store Types — defining customer store categories
- Customer Prospect Approval — approving new customer prospect registrations
- Duplicate Customer — identifying and merging duplicate customer records
- Dealer List — managing authorized dealers and dealer associations

✂ HANDS-ON ACTIVITY

Register a new customer, assign them to a customer group and classification, and submit the record for prospect approval. Then verify it appears in the main customer list.

Lesson 3.2 — Customer Hub & Sales Order Workflow

🕒 Duration: 2.5 hours

TOPICS

- Customer Hub — centralized view of all customer activity and interactions
- Ops Dashboard — operations-level overview of sales orders, status, and alerts
- Salesman Management — registering and managing sales representatives
- Customer Map — geographic view of customer locations
- Create Sales Order — generating new sales orders linked to customers
- Sales Order Draft — saving and managing draft sales orders
- Sales Order Approval — routing sales orders through the approval workflow
- Sales Order Tracing — tracking the status of a sales order end-to-end
- Callsheet — documenting salesman visits and customer interaction records

✂ HANDS-ON ACTIVITY

Create a new sales order for a registered customer, add line items with correct quantities and prices, save as draft, then submit for approval. Track the order status using Sales Order Tracing.

💡 Key Concept

The Sales Order workflow in CRM triggers the fulfillment process in SCM. After a sales order is approved, the Operations Officer must coordinate with SCM Outbound to ensure dispatch.

Lesson 3.3 — Invoicing & Invoice Management

🕒 Duration: 2 hours

TOPICS

- Invoicing — generating customer invoices from approved sales orders
- Invoice Management — viewing, tracking, and managing issued invoices
- Invoice Cancellation — initiating an invoice cancellation request
- Invoice Cancellation Approval — reviewing and approving cancellation requests
- Invoice Summary Report — generating a summary of issued invoices for a period

✂ HANDS-ON ACTIVITY

Generate an invoice from an approved sales order. Practice initiating an invoice cancellation and route it for approval. Then generate an Invoice Summary Report for the current month.

Lesson 3.4 — Site Sales Management

🕒 Duration: 1.5 hours

TOPICS

- Site Sales Management — managing sales transactions at physical sites or branches
- Site Sales Posting — posting confirmed site-level sales transactions
- Site Sales Summary — viewing a consolidated summary of site sales
- Dealer Sales Invoice — generating invoices specific to dealer sales transactions
- Callsheet & Callsheet Printable — printing visit records for salesman use
- Unfulfilled Sales Order Cancellation — cancelling orders that cannot be fulfilled

✂ HANDS-ON ACTIVITY

Post a sample site sales transaction and generate the site sales summary report. Print a callsheet record for a sample salesman visit.

Lesson 3.5 — E-Commerce, Printables & Structure

🕒 Duration: 1 hour

TOPICS

- E-Commerce — managing online orders and order cancellation approvals
- Supplier Information Management — managing supplier references within CRM
- Printables & Product Printables — generating product labels, barcodes, and printable assets
- Structure — understanding the CRM organizational hierarchy (regions, routes, etc.)
- CRM System Management — CRM-level settings and configuration

✂ HANDS-ON ACTIVITY

Generate a product printable (label or barcode) for a sample product. Navigate the CRM Structure module to understand the sales territory hierarchy.

Lesson 3.6 — Inventory Report & Sales Reports within CRM

🕒 Duration: 1 hour

TOPICS

- Inventory Report (CRM) — viewing stock availability from a CRM sales perspective
- Sales Order Report — generating detailed sales order history and summaries
- Document Viewer — viewing and printing generated documents within CRM

✂ HANDS-ON ACTIVITY

Generate a Sales Order Report for the past 30 days. Use the Inventory Report to check which products have low stock before creating a new order.

✅ WEEK 3 CHECKPOINT

- ☐ Can register customers and manage the customer database
- ☐ Can create, draft, approve, and trace sales orders
- ☐ Can generate invoices and handle cancellation requests
- ☐ Can process site sales and generate site summaries
- ☐ Can generate sales and inventory reports from CRM

WEEK 4

Audit, Results & Findings (ARF) + Cross-Module Integration

Lesson 4.1 — Audit Trail & System Activity Review

🕒 Duration: 1.5 hours

TOPICS

- Audit Trail — reviewing all recorded changes and transactions across the system
- Filtering audit records by date range, user, module, or record type
- Identifying discrepancies — what to look for and how to document findings
- Login Activity — reviewing access logs within the ARF module

✂ HANDS-ON ACTIVITY

Run an Audit Trail report filtered by the past 14 days and by the SCM and CRM modules. Identify any edited or deleted records and document at least one observation.

Lesson 4.2 — Post-Delivery Audit

🕒 Duration: 1.5 hours

TOPICS

- Post-Delivery Audit — verifying delivered quantities against sales orders and dispatch records
- Identifying delivery discrepancies (short deliveries, wrong items, damages)
- Creating and submitting a post-delivery audit finding
- How post-delivery results feed into SCM inventory reconciliation

✂ HANDS-ON ACTIVITY

Select a recently completed outbound order. Perform a post-delivery audit, record a simulated discrepancy (e.g., 2 units short), and submit the finding.

💡 Key Concept

Post-Delivery Audits connect the SCM delivery process with ARF compliance reviews. An Operations Officer performs these to ensure customers receive exactly what was ordered.

Lesson 4.3 — Remittance Audit

🕒 Duration: 1.5 hours

TOPICS

- Remittance Audit — reconciling customer payments against issued invoices
- Identifying unmatched or partially matched remittances
- Documenting remittance discrepancies for escalation
- How remittance records link to CRM invoicing and FM treasury

✂ HANDS-ON ACTIVITY

Open the Remittance Audit module. Locate a sample remittance record and verify it against the corresponding CRM invoice. Note any discrepancies found.

Lesson 4.4 — Document Adherence & Inventory Audit

🕒 Duration: 1 hour

TOPICS

- Document Adherence — checking that required supporting documents are attached and complete
- Inventory Management (ARF) — reviewing inventory audit findings and discrepancies
- Traceability & Compliance (ARF) — confirming item lifecycle compliance from supplier to customer
- Asset Management (ARF) — reviewing asset audit checklist records

✂ HANDS-ON ACTIVITY

Review Document Adherence for a set of recent transactions. Flag any transaction missing a required document. Run the Traceability & Compliance report for a selected product batch.

Lesson 4.5 — Cross-Module Workflows & Integration Scenarios

🕒 Duration: 2 hours

TOPICS

- How a CRM Sales Order triggers an SCM Outbound fulfillment
- How an SCM delivery generates an ARF Post-Delivery Audit requirement
- How a CRM Invoice creates a Remittance Audit record in ARF
- What to do when a discrepancy is found — escalation paths

INTEGRATION SCENARIOS

SCENARIO A — SALES TO DELIVERY TO AUDIT CRM SCM ARF

- 1 **CRM:** Create and approve a sales order for a customer
- 2 **CRM:** Generate the invoice for the approved sales order
- 3 **SCM:** Process the outbound order and dispatch the delivery
- 4 **ARF:** Conduct a post-delivery audit to verify quantities delivered
- 5 **ARF:** Verify the remittance once customer payment is received

SCENARIO B — RETURN & COMPLIANCE CHECK SCM ARF

- 1 **SCM:** Log a customer return via Returns & Reverse Logistics
- 2 **SCM:** Restock the returned items to the correct warehouse location
- 3 **ARF:** Run Document Adherence to confirm the return is properly documented
- 4 **ARF:** Use Traceability & Compliance to trace the returned item history

SCENARIO C — SITE SALES TO INVOICE TO AUDIT CRM ARF

- 1 **CRM:** Post a site sales transaction via Site Sales Management
- 2 **CRM:** Generate the Dealer Sales Invoice from the site transaction
- 3 **CRM:** Generate the Site Sales Summary report
- 4 **ARF:** Run the Remittance Audit to match the invoice with payment received

✅ WEEK 4 CHECKPOINT

- ☐ Can run and filter Audit Trail reports by module and date
- ☐ Can conduct a post-delivery audit and record a finding
- ☐ Can review and reconcile remittance records
- ☐ Can check document adherence and flag missing documents
- ☐ Can execute all 3 cross-module integration scenarios

Quick Reference — Navigation Paths

Module	Subsystem	URL Path
Inventory Management	SCM	/scm/inventory-management
Receiving & Put-Away	SCM	/scm/receiving-put-away
Outbound	SCM	/scm/outbound
Order Fulfillment & Distribution	SCM	/scm/order-fulfillment-distribution
Traceability & Compliance	SCM	/scm/traceability-compliance
Monitoring	SCM	/scm/monitoring
Customer Management	CRM	/crm/customer-management
Customer Hub	CRM	/crm/customer-hub
Invoicing	CRM	/crm/invoicing
Invoice Management	CRM	/crm/invoice-management
Site Sales Management	CRM	/crm/site-sales-management
Audit Trail	ARF	/arf/audit-trail
Post-Delivery Audit	ARF	/arf/post-delivery-audit
Remittance Audit	ARF	/arf/remittance-audit
Document Adherence	ARF	/arf/document-adherence
